

Ishtehar Hussain

Software Engineer - Toronto ON, Canada

EXPERIENCE

Senior Software Engineer – CoFounder

Nebulous Technologies Limited – On-site

Mar 2025 - Oct 2025

Dhaka, Bangladesh

Led the engineering team responsible for developing our flagship SaaS product. Pitched ERP solutions to clients to help secure key development contracts. Ensured that all projects were properly resourced and delivered on time and within budget.

Senior Software Engineer

Grin Inc – Remote

Sep 2023 - May 2024

Sacramento, CA, USA

Contributed to various backend and frontend features and bugfixes. Participated in architecting solutions to various optimization and data integrity challenges. Relevant technologies include PHP (Laravel), GoLang, NodeJS, Vue, Typescript, Docker, Redis, MongoDB, MySQL.

Software Developer

Alley Interactive – Remote

Feb 2021 - Jun 2023

New York, NY, USA

Participated in scrum teams working on various medium and large scale client projects. This involved designing systems and solutions in PHP (WordPress and Laravel), with reactive front-ends written in React or Vue on Typescript.

Senior Full Stack Developer

Revival Point LLC – Remote

Jul 2019 - Jun 2020

New York, NY, USA

I led a small team to rebuild the internal reporting systems for the company into microservices. We also performed a complete DevOps overhaul on legacy PHP codebases which included migrating to AWS, setting up automatic periodic backups, setting up error logging and notifications, setting up additional dev and staging environments and CI pipelines. This improved the accuracy of sales reports by 10% and ROAS reports by 15%.

Senior Software Developer

LeverageIT – Hybrid

May 2018 - Apr 2019

Toronto, ON, Canada

Led a small team in the development of apps and microservice based solutions for our clients. Backends were usually written in Laravel or GoLang with Angular or Vue front-ends. These were various 3rd party APIs and services. Provisioned and maintained resources for deployment. I was able to get the team to adopt GitFlow which reduced merge conflicts by 50% and sped up our release cycles.

Full Stack Developer

Ariad Communications – On-site

Aug 2017 - Apr 2018

Toronto, ON, Canada

Worked in a small team to develop and maintain medium sized sites on WordPress and small microsites on Laravel/Lumen framework. Performed various DevOps tasks such as setting up servers, backing up databases, writing CI pipelines.

Full Stack Web Developer

York University – On-site

Jan 2014 - Apr 2017

Toronto, ON, Canada

Built and deployed features on various school sites mainly written in WordPress. Wrote a simple PHP app for tasks such as periodic data backups, sanitization of input files, calculations on simple data, etc.
